

TECHNICAL PROFESSIONAL

FCS - CAREGIVING (ADULT CARE)

Grade 12

**Three-Term Budget Of Work (BOW)
for Learning Competencies**

TECHNICAL PROFESSIONAL

FCS - AESTHETIC, WELLNESS, AND HUMAN CARE

Grade 12

Three-Term Budget Of Work For Learning Competencies

Please note that each TechPro elective is completed within one term if delivered at Grade 12.

Term Plan	
Elective	Caregiving (Adult Care)
Content Standard	• The learners demonstrate understanding in the career opportunities, occupational health and safety, legal and ethical issues in adult care, therapeutic and non-therapeutic communication, care plan, infection control procedures, standard first aid, and basic life support. • The learners demonstrate an understanding of the phases of the aging process and of the importance of taking vital signs. • The learners demonstrate an understanding of the food pyramid and therapeutic diet, feeding techniques, proper storage and disposal of left-over food, basics of toileting and elimination, bathing techniques, perineal/genital care, oral care procedure and bed making procedure. • The learners demonstrate an understanding of safe ambulation and transfer techniques, basic wound care techniques, heat/cold therapy techniques, palliative care, and medication administration assistance.
Performance Standard	The learners perform infection control procedures, standard first aid, basic life support in accordance with Philippine National Red Cross and care plan. The learners perform taking vital signs. The learners perform feeding techniques, left-over food storage and disposal, basics of toileting and elimination, bathing techniques, perineal/genital care, oral care procedure and bed making procedure. The learners demonstrate safe ambulation and transfer techniques,

	basic wound care techniques, heat/cold therapy techniques, and medication administration assistance.
--	--

Week	Learning Competency	Suggested Activities
1	Discuss career opportunities, occupational health, safety policies, and legal and ethical issues of adult care.	Career Pathway Research - Individually research different career opportunities in adult care and create a short report explaining required qualifications and potential growth. Group Discussion on Legal and Ethical Scenarios - In groups, discuss real-life scenarios involving safety policies and ethical dilemmas in adult care and present solutions to the class.
2	Compare therapeutic with non-therapeutic communication.	Communication Reflection - Individually reflect on a personal experience of therapeutic or non-therapeutic communication and write how it could have been improved. Role-Play Exercise - In groups, perform role-play scenarios demonstrating therapeutic and non-therapeutic communication techniques and analyze the outcomes.

Week	Learning Competency	Suggested Activities
3	- Perform infection control techniques in accordance with industry practices. - Demonstrate first aid and basic life support standards in accordance with Philippine Red Cross procedures.	Hand Hygiene and PPE Practice - Individually demonstrate proper handwashing and use of personal protective equipment following industry standards. Infection Control Audit Simulation - In groups, inspect a simulated caregiving area for hygiene and infection control compliance and report findings. Individual BLS Skills Practice - Perform CPR and basic first aid on a mannequin according to Philippine Red Cross guidelines. Group Emergency Drill - In groups, simulate an emergency scenario requiring first aid and BLS, coordinating roles and response.
4	- Create a caregiving plan using SMARTER (Specific, Measurable, Attainable, Realistic, Time-bound, Evaluate, Re-evaluate) approach. - Discuss the phases of body system in relation to aging process.	Individual Care Plan Design - Create a personal caregiving plan for a hypothetical client using the SMARTER framework. Group Care Plan Review - In groups, exchange caregiving plans, provide feedback, and suggest improvements based on SMARTER criteria.

Week	Learning Competency	Suggested Activities
		• Aging Process Reflection ◦ Individually research one body system and describe how it changes with age in a short report. • Group Presentation ◦ In groups, create a visual presentation explaining how multiple body systems interact during aging.
5	• Perform the procedure in taking the vital signs. • Perform feeding techniques.	• Individual Vital Signs Practice ◦ Measure temperature, pulse, respiration, and blood pressure on a classmate or mannequin, recording results accurately. • Peer Vital Signs Challenge ◦ In groups, take turns measuring vital signs and compare results for accuracy and consistency. • Individual Feeding Practice ◦ Practice safe and hygienic feeding techniques on a mannequin or volunteer while monitoring for choking hazards. • Group Scenario Simulation ◦ In groups, role-play feeding a client with special needs, demonstrating correct technique and teamwork.

Week	Learning Competency	Suggested Activities
6	- Perform basics of toileting and elimination procedure. - Perform bathing techniques.	Individual Skills Practice - Demonstrate proper toileting assistance techniques and hygiene maintenance on a mannequin. Group Problem-Solving - In groups, discuss challenging scenarios in toileting care and present safe, practical solutions. Individual Bed Bath Practice - Perform a bed bath or sponge bath on a mannequin while following hygiene and safety guidelines. Group Observation & Feedback - In groups, observe each other performing bathing procedures and provide constructive feedback.
7	- Perform perineal/genital care techniques. - Perform oral care procedure.	Individual Skills Practice - Perform perineal/genital care on a mannequin following infection control standards. Group Discussion on Privacy & Dignity - In groups, discuss strategies for maintaining client privacy and dignity while performing personal care. Individual Oral Care Practice - Demonstrate oral care on a mannequin or client model, including brushing,

Week	Learning Competency	Suggested Activities
		flossing, and denture cleaning. • Group Oral Hygiene Presentation ◦ In groups, create a short presentation on the importance of oral care for adults and best practices.
8	• Perform hospital bed making techniques. • Perform safe ambulation and transfer techniques.	• Individual Bed Making Practice ◦ Make a hospital bed correctly, including linen changes and proper positioning for patient safety. • Group Efficiency Challenge ◦ In groups, practice bed making as a timed activity to improve speed and accuracy while maintaining standards. • Individual Practice ◦ Demonstrate safe transfer techniques from bed to wheelchair or chair using proper body mechanics. • Group Peer Assistance Drill ◦ In groups, practice assisting multiple "clients" through safe ambulation and transfer scenarios.
9	• Perform basic wound care techniques. • Perform heat/cold therapy techniques.	• Individual Dressing Change Practice ◦ Perform a basic wound dressing change on a mannequin following infection control protocols. • Group Case Study Discussion

Week	Learning Competency	Suggested Activities
		○ In groups, discuss different types of wounds and appropriate care procedures for each type. ● Individual Application Practice ○ Apply heat or cold therapy to a mannequin or model safely, noting timing and precautions. ● Group Scenario Simulation ○ In groups, role-play a patient scenario requiring heat or cold therapy and explain your approach.
10	● Discuss palliative care. ● Perform medication administration assistance.	● Individual Reflection on Palliative Care ○ Write a reflection on the role of palliative care in improving quality of life for adult clients. ● Group Case Study ○ Analyze a case study of a terminally ill client and discuss a palliative care approach in groups. ● Individual Practice ○ Practice assisting a client with oral medication administration following safety guidelines. ● Group Role Play ○ In groups, simulate a medication schedule for multiple clients, demonstrating correct assistance and

Week	Learning Competency	Suggested Activities
		recording.
11	Calculate the service cost in providing caregiving services.	Individual Calculation Exercise - Calculate the cost of providing adult care services for a client using a provided rate sheet. Group Budget Planning - In groups, develop a sample budget for caregiving services, including supplies, labor, and contingency costs.
Suggested Performance Tasks		Individual Activity: Infection Control & First Aid Skills Practice - Individually demonstrate proper hand hygiene, use of PPE, basic first aid, and BLS techniques on a mannequin following Philippine Red Cross guidelines. Group Activity: Care Plan Simulation - In groups, create a caregiving plan for a hypothetical client including infection control measures, first aid response, and BLS protocols, and present it to the class. Individual Activity: Vital Signs Practice - Individually measure temperature, pulse, respiration, and blood pressure on a classmate or mannequin and record the results accurately. Group Activity: Peer Vital Signs Challenge - In groups, take turns measuring each other's vital signs, compare results, and discuss discrepancies and accuracy improvement strategies. Individual Activity: Personal Care Skills Practice - Individually perform one of the following on a mannequin or model: feeding, toileting assistance, bathing, perineal/genital care, oral care, or bed making, following hygiene and safety protocols.

Week	Learning Competency	Suggested Activities
	• Group Activity: Care Routine Simulation ○ In groups, rotate roles to simulate a complete caregiving routine for a client, performing all the above procedures while peers observe and provide feedback. • Individual Activity: Practical Skills Lab ○ Individually demonstrate one skill (safe ambulation/transfer, wound care, heat/cold therapy, or assisting with medication) on a mannequin or model following safety protocols. • Group Activity: Integrated Care Scenario ○ In groups, simulate a client care scenario requiring multiple skills—ambulation, wound care, therapy, and medication assistance—and coordinate care as a team while peers evaluate technique, safety, and effectiveness.
