

TECHNICAL PROFESSIONAL

FCS - CAREGIVING (CHILD CARE)

Grade 12

**Three-Term Budget Of Work (BOW)
for Learning Competencies**

TECHNICAL PROFESSIONAL

FCS - AESTHETIC, WELLNESS, AND HUMAN CARE

Grade 12

Three-Term Budget Of Work For Learning Competencies

Please note that each TechPro elective is completed within one term if delivered at Grade 12.

Term Plan	
Elective	Caregiving (Child Care)
Content Standard	• The learners demonstrate understanding in occupational safety and health policies and procedures (OHS), career and business opportunities, therapeutic and non-therapeutic communication, care plan, infection control procedures, standard first aid, and basic life support. • The learners demonstrate understanding in taking vital signs. • The learners demonstrate understanding in pre-natal and post-natal care, breast feeding techniques and position, new born screening test, common types of vaccines and side effects, different stages of growth and development, bathing procedures, and feeding techniques and sleeping habits. • The learners demonstrate understanding the different behavioral patterns, common routines and principles of medication administration.
Performance Standard	The learners perform infection control procedures, standard first aid, and basic life support in accordance with the Philippine National Red Cross. The learners perform taking vital signs. The learners perform bathing and feeding procedures. The learners perform common routines in child care.

Week	Learning Competency	Suggested Activities
1	- Discuss the occupational safety and health policies and procedures (OHS), and career opportunities in caregiving. - Compare the therapeutic and non-therapeutic communication. - Create a caregiving care plan using the SMARTER (Specific, Measurable, Attainable, Realistic ,Time-bound, Evaluate, Re-evaluate) approach.	OHS Reflection - Research and write a reflection on the importance of occupational safety and health policies in caregiving. Career Opportunities Presentation - Prepare a short presentation highlighting different career opportunities in adult and child caregiving, including safety and workplace standards. Communication Reflection - Write a short reflection on a personal experience of therapeutic or non-therapeutic communication and its impact. Role-Play Exercise - Perform a role-play demonstrating both therapeutic and non-therapeutic communication techniques and discuss the outcomes. Care Plan Creation - Develop a caregiving plan for a hypothetical client using the SMARTER framework. Care Plan Analysis - Review an existing care plan and identify areas for improvement based on SMARTER criteria.

Week	Learning Competency	Suggested Activities
2 to 3	- Perform infection control procedures in accordance with the industry practices. - Demonstrate first aid and basic life support standards in accordance with the Philippine Red Cross.	Infection Control Demonstration - Demonstrate proper hand hygiene, PPE use, and cleaning of caregiving tools and environment. Infection Control Checklist - Create a checklist of infection control steps and apply it to a simulated caregiving area. BLS Practice - Perform CPR and basic first aid on a mannequin following Philippine Red Cross guidelines. Emergency Scenario Simulation - Simulate an emergency scenario requiring first aid and BLS, explaining your actions and reasoning.
4 to 6	Perform the procedures in taking the vital signs.	Vital Signs Measurement - Measure temperature, pulse, respiration, and blood pressure on a mannequin or classmate and record results. Vital Signs Analysis - Compare recorded vital signs to normal ranges and write a short report on findings and recommendations.
7	Discuss the pre-natal and post-natal care.	Research Report

Week	Learning Competency	Suggested Activities
	- Discuss the appropriateness of breast feeding techniques and positions. - Discuss the newborn screening test.	- Write a report on key pre-natal or post-natal care practices and their importance. Case Study Discussion - Analyze a pre-natal or post-natal scenario and suggest best caregiving practices. Position Demonstration - Demonstrate correct breastfeeding positions using a doll and explain benefits. Reflection on Techniques - Write a reflection on challenges mothers may face with breastfeeding and strategies to overcome them. Screening Research - Research common newborn screening tests and write a summary explaining their purpose. Case Scenario Analysis - Analyze a scenario where a newborn screening test is critical and discuss follow-up steps.
8	- Discuss the common types of vaccines and side effects in newborns up to preschoolers. - Discuss the different stages of growth and development of infants to preschoolers.	Vaccine Chart - Create a chart showing vaccines, recommended age, and common side effects.

Week	Learning Competency	Suggested Activities
	• Perform bathing procedures. • Perform the appropriate feeding techniques.	• Presentation on Vaccination ◦ Prepare a short presentation explaining the importance of vaccination schedules for young children. • Development Timeline ◦ Create a timeline showing key developmental milestones from birth to preschool age. • Milestone Discussion ◦ Write notes on how each stage influences caregiving activities and strategies. • Bathing Skills Demonstration ◦ Demonstrate safe and hygienic bathing procedures for infants or young children. • Hygiene Checklist ◦ Create a checklist of steps for proper bathing and apply it during practice. • Feeding Demonstration ◦ Demonstrate proper feeding techniques, including positioning and safety measures. • Feeding Reflection ◦ Write a reflection on challenges faced during feeding and ways to ensure safety and comfort.

Week	Learning Competency	Suggested Activities
9	Discuss the different sleeping habits.	Sleep Schedule Planning - Create a daily sleep schedule for a child considering age-appropriate sleep needs. Sleep Reflection - Write a reflection on how sleep habits affect a child's growth, behavior, and caregiving approach.
10	- Discuss the different behavioral patterns. - Perform the common routine activities.	Behavior Observation - Observe a child and record notes on behavioral patterns, triggers, and responses. Behavior Strategy Discussion - Suggest strategies for managing common behavioral issues in infants and preschoolers. Routine Care Demonstration - Perform one routine caregiving activity (feeding, diapering, or bathing) following proper hygiene and safety procedures. Routine Documentation - Create a daily routine log for a child, noting times and procedures for all routine activities.
11	Discuss the principles of medication	Medication Simulation

Week	Learning Competency	Suggested Activities
	administration. Calculate the service cost in providing caregiving services.	- Simulate administering medication safely, emphasizing accuracy and proper documentation. Medication Reflection - Write a reflection on key principles of medication safety and potential risks of errors. Service Cost Calculation - Calculate the total cost of caregiving services for a hypothetical client, including labor, supplies, and contingencies. Budget Planning Exercise - Prepare a sample budget for caregiving services and explain the allocation of resources.
Suggested Performance Tasks	Individual Activity: Infection Control & BLS Skills Practice - Demonstrate proper hand hygiene, use of PPE, basic first aid, and perform CPR on a mannequin according to Philippine Red Cross guidelines. Group Activity: Emergency Response Simulation - In groups, simulate an emergency scenario where infection control and BLS are required. Assign roles, perform procedures, and evaluate team coordination and adherence to safety protocols. Individual Activity: Vital Signs Practice - Measure temperature, pulse, respiration, and blood pressure on a classmate or mannequin and accurately record the results. Group Activity: Peer Vital Signs Comparison	

Week	Learning Competency	Suggested Activities
		○ In groups, take turns measuring each other's vital signs, compare results, and discuss variations and accuracy improvement strategies. ● Individual Activity: Bathing and Feeding Skills Practice ○ Perform a complete bathing procedure and a feeding session on a mannequin or model, following hygiene and safety standards. ● Group Activity: Care Routine Simulation ○ In groups, rotate roles to simulate a full caregiving session including bathing and feeding, while peers observe and provide feedback on technique and safety compliance. ● Individual Activity: Routine Care Demonstration ○ Demonstrate one routine child care activity (e.g., diapering, dressing, or oral care) correctly and safely. ● Group Activity: Daily Routine Simulation ○ In groups, plan and perform a complete daily care routine for a child, assigning different tasks to each member and ensuring all activities are done safely and efficiently.
